VicAnalytics™

Better outcomes start with clear insights and AI

Gain deep visibility into your AP operations with detailed reporting on invoice processing speed and accuracy, platform performance monitoring, and customizable dashboards — turning data into actionable insights that drive efficiency and automation.

VicAnalytics™ packages are a core component of the Vic.ai platform, designed to automate and optimize the entire accounts payable (AP) invoice management process. It provides direct line-of-sight into AP team performance to drive operational improvements both on and off the Vic.ai platform.

See the difference in your operations with measurable AI

- **Real-time visibility into performance**

Track accuracy rates, no-touch invoices, and processing volumes to ensure optimal platform performance.

- **Optimized workflows and audits**

Compare processing times, identify bottlenecks, and automate monthly audits with ease.

- **Actionable metrics**

Measure ROI, create custom dashboards, and export data for deeper analysis.

“VicAnalytics™ gives us the ability to enhance employee engagement to drive technology adoption. Before Vic.ai, we had no reliable data to help us measure processing speeds. Now we can see the average processing time per invoice, broken down per employee.” - Colman Edwards, Director of Technology

Analytics packages designed for each stage of the autonomous AP journey

STANDARD ANALYTICS See the impact of Vic.ai, starting day one. This package is designed for customers new to AI and the platform. Users can track AI confidence rates over time, and a detailed user guide with common use cases and key questions helps maximize dashboard value.

- Includes:
- *Total invoices processed this month*
 - *Total accuracy this month*
 - *Percent no-touch this month*
 - *Percent automated this month*
 - *Monthly invoice processed volume*
 - *Accuracy rate month over time*
 - *Percent no-touch over time*
 - *Percent fully automated*
-

ADVANCED ANALYTICS Get real-time insights into AP efficiency with additional functionality. This package is designed to support strategic decision-making for AP Managers, Controllers, Accounting VPs, and CFOs with dashboards for both AP teams and executives. Customers can also simplify the end-of-month close with exportable reports.

- Includes:
- *Standard Analytics, plus:*
 - *Executive dashboards: Return on Vic.ai investment, AI performance, payments, Autopilot enablement*
 - *AP team dashboards: Approvals, efficiency, transactions, PO matching*
 - *Total spend posted this month*
 - *Invoice audit reports: Accruals, GL amount, payment reconciliation, processed invoices*
 - *Performance reports: Company invoice status, invoice accuracy, user processing time, vendor accuracy*
 - *Number of active companies*
-

PREMIUM ANALYTICS Make impactful decisions using AI-powered insights tailored to your business. For customers who have already maximized their AP team performance and are looking to uplevel their workflows, Premium Analytics is designed to provide insights for off-platform optimization, such as speed and velocity. Our in-house Analytics team partners with customers to design custom reports and provide raw data file exports to support specific operational needs.

- Includes:
- *Advanced Analytics, plus:*
 - *Cost account changes*
 - *Processing actions*
 - *Spend*
 - *Velocity*
 - *Raw data file export*
 - *Custom reports*

Vic.ai empowers AP teams with unmatched transparency

VicAnalytics™ is designed to empower teams with real-time insights that enhance decision-making while contributing to more sustainable, efficient operations — one informed decision at a time. It provides the benefits of AI along with direct visibility into AP processes.

- **Actionable insights that make a difference:** Vic.ai's visualizations go beyond surface-level data, offering insights that reveal the full picture. These insights illuminate the "why" behind workflows, enabling businesses to make impactful changes that optimize efficiency and drive long-term success.
- **Effortless efficiency gains:** Monitoring user performance is crucial for improving overall process efficiency. Vic.ai makes it simple to gauge an AP team's efficiency in real-time and pinpoint addressable issues, such as bottlenecks in the approval process.
- **Automated reporting for faster decisions:** Vic.ai's intuitive, user-friendly reports provide the most accurate, up-to-the-minute view of business operations. Standardized AP reports keep stakeholders informed on critical KPIs like invoice processing time and accuracy rates, with everything easily configurable, customizable, shareable, and permission-able.

Seamless integration with your tech stack

Vic.ai integrates with all major HRIS and procurement systems, offering built-in connections with leading ERPs like Oracle, SAP, and Microsoft Dynamics. This ensures a smooth, unified experience across your financial operations.

See how Vic.ai can elevate your AP operations with AI-driven accuracy and seamless automation.
