# Streamline Payments, Reduce Fraud, and Unlock Further ROI

Payments from Vic.ai enables comprehensive automation for all payments, including Virtual Card benefits, for businesses of all sizes. Our full-service, ERP-agnostic, automated payment solutions empowered your AP team to save time and costs by consolidating all your vendor payments into a single workflow.

Save team time and streamline your AP process with a single automated workflow

Save money by taking advantage of AI-detected early payment discounts and $0 US transaction fees

Outsource data management and vendor support tasks

Optimize collaboration with timely notifications and approvals

Cut costs by reducing paper check payments save the average cost of $31 per business check*

Mitigate fraud with safer virtual card payments and comprehensive security infrastructure for all payments

Get a Single Platform for AP Processing

Take the next step towards autonomous finance with Payments from Vic.ai. Optimize your entire AP workflow with the Vic.ai platform, leveraging AI for more accurate and efficient invoice processing and payments. Create a single workflow for all payment types and maintain full control and visibility of your payment process.

Save Money With Payments

Take advantage of early payment discounts. Our AI-first platform automatically identifies eligible bills and processes invoices 80% faster, so you can seize every discount opportunity. Plus, with no US transaction fees, you can pay how and whenever you want, for free.

Manage Vendor Relations

Boost your working capital with our flexible payment. Let us manage your vendor relationships on your behalf from onboarding to advocating preferred forms of payment. Securely manage your sensitive payment information.

Mitigate Fraud

Protect your payments against fraud with our fully resourced security and compliance infrastructure that protects all payments in our network, regardless of transaction type.

Reduce Costs

Cut your payment costs in terms of both money and time. Reduce your check-payment costs, avoid costs due to payment errors, and outsource your vendor data storage and maintenance tasks.
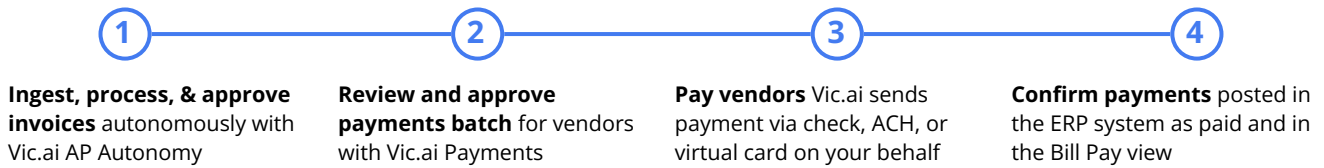

More Electronic Payments

Optimize your payment strategy with an increased focus on electronic vendor payments. Our dynamic continuous vendor enablement and extensive 3.8M vendor network mean more opportunities for you to pay digitally, giving you greater control of your process and helping reduce fraud.

Benefit From

⭐ **Vendor Services & Continuous Enrollment**

⭐ **Payment Fraud Protection & Secure Vendor Data**

Comprehensive Implementation Support and Payment Services

Implementation and Onboarding

• A dedicated team helps you implement Vic.ai with minimal-to-no burden on your IT team.

• Technical resources work with you to help plug our bank- and ERP-agnostic solution into your existing systems.

• Throughout the process, we work closely with your team, providing the training and resources you need for successful onboarding.

Payment Services

• Single vendor for end-to-end invoice processing no matter how you want to pay - check, ACH, virtual card, and international.

• Our vendor network includes 3.8M vendors ready to receive payments via Vic.ai — with nearly half a million already accepting our virtual card.

• Our vendor teams follow up on unprocessed payments, and field payment status calls on your behalf.

Payments is an AP payments solution that is fully integrated with the rest of the Vic.ai platform. Streamline your AP processing from invoice ingestion to payment and gain the benefits of autonomous finance with a single provider.
