Smart Email Categorization: Automatically tags and organizes emails into categories like Payment Status Inquiries, Duplicate Invoice Issues, and Bank Account Changes, enabling AP teams to prioritize their workload.
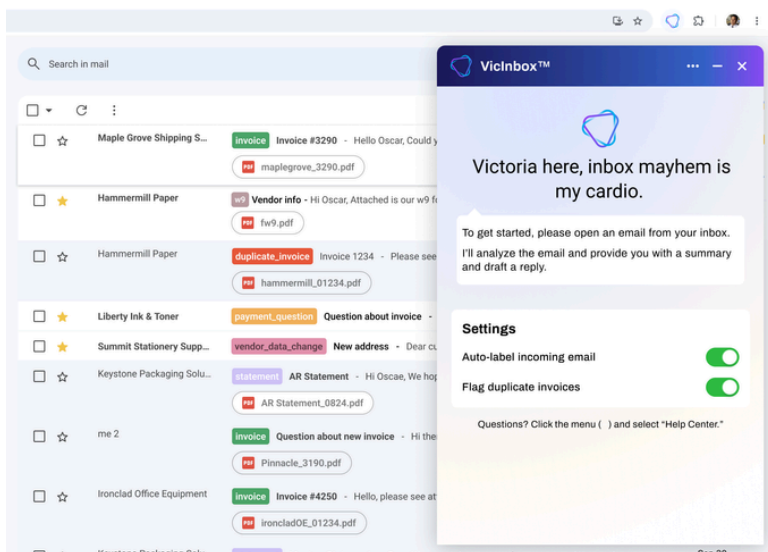

AI-Crafted Responses: Generates highly contextual replies to vendor inquiries using real-time data from Vic.ai and ERP systems, allowing teams to review and approve responses with ease.

Automated Invoice Processing: Directly processes invoices received via email, identifying and blocking duplicates while supporting multiple formats, including PDFs and handwritten documents.

AI-powered vendor communication

VicInbox™ is more than just an email management tool—it's a productivity accelerator for Accounts Payable teams. Empower your team with tools that streamline their workflows and enable them to focus on strategic tasks:

- **Enhance productivity** by eliminating manual email categorization and response drafting.

- **Improve vendor relationships** through faster, more accurate communication.

- **Achieve seamless invoice processing** directly from the inbox, reducing delays and errors.

Seamless integration with your tech stack

Vic.ai integrates effortlessly with major email providers like Outlook and Gmail, and connects with leading ERPs such as Oracle, SAP, and Microsoft Dynamics. This ensures a unified, streamlined experience across your financial operations.
