

Vic.ai Payments

Simplify payments with an AI-first AP platform

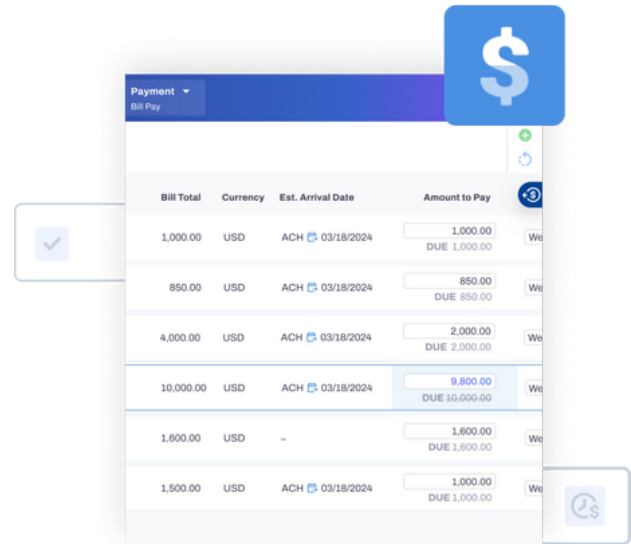

Universal payment support, automated early discount capture, secure vendor management, seamless ERP integrations, and real-time savings insights—with zero transaction fees.

Vic.ai Payments is a core component of the Vic.ai platform, designed to automate and optimize the entire accounts payable (AP) invoice management process with an AI-first approach. It eliminates the need for manual intervention by learning and adapting to your unique invoice workflows, resulting in higher productivity and fewer errors.

Pay your bills faster and save money

- **Flexible payment flows**
Simplify vendor management and payment processing with support for all payment types, including check, ACH, virtual card, and international wires.
- **Accelerated payment cycles**
Shorten bill processing times for faster payments and optimize for AI-detected early-payment discounts.
- **Centralized control and enhanced security**
Manage user permissions and audit logs for full visibility. API-driven processes ensure secure, automated data transmission and storage.

“Vic.ai eliminated all the manual components of our payments process, giving each AP analyst 3-6 hours back on their Fridays.”
-Andrew Turkish VP and Corporate Controller

AI designed to make bill pay more efficient

- **Unified AP platform**

A single software platform for managing the entire AP process—from invoice ingestion and PO matching to approvals, to B2B payments.

- **Supports all payment types, including secure electronic formats**

Make payments by check, ACH, virtual card, or international wires in one payment file. Use ACH and virtual cards to reduce risk of fraud and theft with encrypted data and secure authentication.

- **No hidden transaction fees**

Enjoy \$0 transaction fees when paying within the U.S., whether by check, card, or ACH, improving the health of your bottom line.

- **Centralized control**

Easily manage user permissions across entities and teams, ensuring consistent governance and compliance across your organization.

- **Automated payment approval routing**

Automate payment approvals and routing based on custom rules such as vendor, amount, GL account, or cost center, ensuring accuracy and compliance every time.

- **AI-detected early payment discounts**

Automatically identify bills eligible for early payment discounts and capture them effortlessly, providing significant savings opportunities.

- **Customizable filtering**

Use powerful filters to sort payments by type, amount, vendor, and status, helping AP teams prioritize work, reduce bottlenecks, and capture discounts.

- **Comprehensive audit trail**

Keep a detailed log of every action, comment, approval, and decision made during the payment process, ensuring transparency and accountability.

- **Vendor and banking information management**

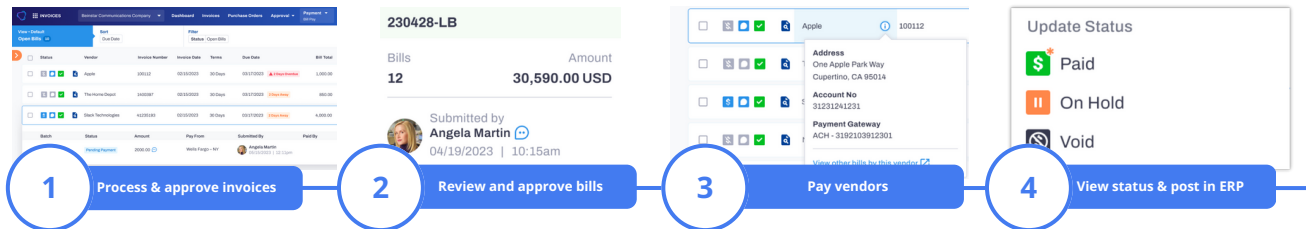

Vic.ai verifies vendors, securely stores banking info, and protects customer details by processing payments directly through the platform, reducing risk.

- **Real-time insights and reporting**

Get full visibility into payment status, bottlenecks, and processing times with customizable dashboards that provide actionable insights.

How Vic.ai Payments works

Our AI learns from every transaction and every interaction, continuously improving its ability to process and manage payments with greater speed and accuracy. From initial invoice ingestion to final payment, Vic.ai takes the complexity out of payment processing, enabling your team to operate more efficiently.

Streamline payments and reduce fraud with AI

Vic.ai Payments provides a secure alternative to traditional checks, reducing fraud and speeding up payment cycles. With a unified platform that uses advanced AI, Vic.ai simplifies AP processes, improves cash flow management, and enhances security.

Simplify end-to-end invoice processing: Manage the entire AP workflow with a single platform that handles vendor relationships on your behalf.

Capture early payment discounts: Take advantage of AI-detected early payment discounts and save money.

Enhance security and protect against fraud: Reduce risks of check fraud with secure options like ACH and virtual cards, with Vic.ai managing vendor enrollment and payments.

Seamless integration with your tech stack

Vic.ai integrates with all major HRIS and procurement systems, offering built-in connections with leading ERPs like Oracle, SAP, and Microsoft Dynamics. This ensures a smooth, unified experience across your financial operations.

See how Vic.ai can elevate your AP operations with AI-driven accuracy and seamless automation.
