Vic.ai processes invoices faster and more accurately than template- and rules-based accounting automation solutions. Use AI to centralize and streamline AP processes, ensuring precise and efficient workflows across all entities. Optimize FTE allocation across your team to improve productivity and prepare for growth.

- **AP on Autopilot:** True hands-free accounting with the highest percent of no-touch invoices, classified by AI at both header and line item level.
- **Measurable, proven AI:** Trained on over 1 billion invoices, our AI is 97% accurate out-of-the box, surfacing actionable, real-time insights.
- **Built for real-world complexity:** Handle even the most elaborate, multi- entity scenarios and centralize AP operations, approval flows, and access controls.
- **Best-in-class ROI:** Savings you can actually measure with a payback period of less than 7 months on average. Scale existing headcount and save costs due to errors and fraud.

"Vic.ai's current offerings, including Autopilot and Autonomous Approval Flows allow our business to keep growing at a rapid pace without requiring us to grow our workforce at the same pace."

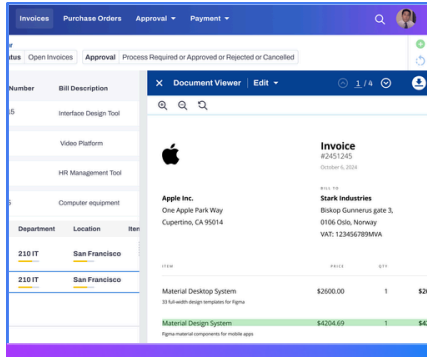

– Conor Clair, Senior Finance Manager of Accounting
